

## Example

# Template-driven Forms (no binding)

Creazione del Form  
delegata ad Angular

```
<form #userForm="NgForm" (ngSubmit)="onSubmit(userForm)">  
  <input type="text" ngModel required>  
  <input type="text" ngModel required>  
</form>
```

Example

# Reactive Forms

```
export class UserComponent {  
    public user = new FormGroup(  
        name: new FormControl("", Validators.required),  
        surname: new FormControl("", Validators.required)  
    )  
}
```
