THE PRACTICALITY OF THE PROPOSED APPROACH

The proposed approach is based on the assumption that the system can be represented by a linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

The practicality of the proposed approach depends on the accuracy of the linear model.

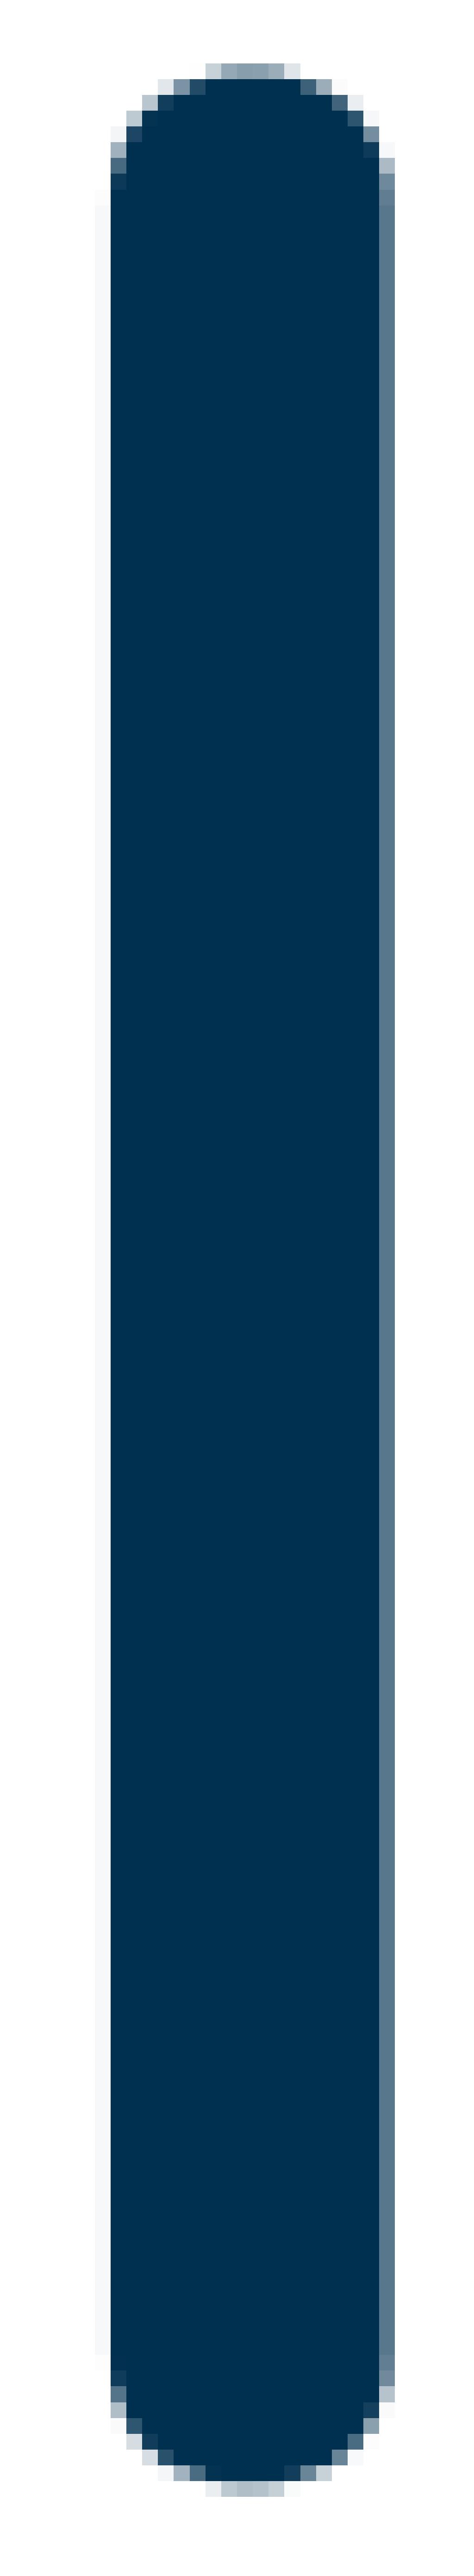

The practicality of the proposed approach depends on the accuracy of the linear model.
