AuthService auth:AuthService() {
 return auth;
}

@Self

```
constructor(@Self() auth: AuthService) {}
```

Passami un'istanza di
AuthService, ma cerca solo
nel mio Injector!

@Self()

Utile per:

- Assicurarsi di iniettare il servizio specificato nello stesso componente
- In una direttiva, iniettare un servizio specificato nell'elemento sul quale è usata

@Self

```
<my-component A>
```
