

Form nidificati - Template-driven forms

Gestione degli errori: dall'esterno

```
<form #f="NgForm">  
  <customer ngModel customerValidator />  
  <address ngModel addressValidator />  
  <payment ngModel paymentValidator />  
</form>
```

Gestione degli errori: dall'esterno

```
this.form = new FormGroup({  
  customer: new FormControl({}, customerValidator),  
  address: new FormControl({}, addressValidator),  
  payment: new FormControl({}, paymentValidator)  
})
```
