window non esiste (su server)

quindi niente *document*, *navigator*, *localStorage*...

```
import { PLATFORM_ID } from '@angular/core';
import { isPlatformBrowser, isPlatformServer } from '@angular/common';

constructor(@Inject(PLATFORM_ID) private platformId: string) { }

ngOnInit() {
    if (isPlatformBrowser(this.platformId)) {
        localStorage.set(...);
    }
}
```
