Bad Practice #2: accedere al form padre

```
constructor(parentForm: FormGroupDirective) {
    parentForm.addControl('customer', new FormGroup({
        name: new FormControl(),
        surname: new FormControl(),
        fiscalCode: new FormControl()
    }));
}
```

Bad Practice #2: accedere al form padre

```
@Component({

    selector: 'customer',

    template: '
        <div ngModelGroup="customer">
            <input ngModel name="name">
            <input ngModel name="surname">
        </div>
    ',
    viewProviders: [{ provide: ControlContainer, useExisting: NgForm }]
})
```
