AuthGuard - Universal

```
@Injectable()
export class AuthGuard implements CanActivate {

  constructor(@Inject(PLATFORM_ID) private platformId: string) {}

  canActivate() {
    if (isPlatformServer(this.platformId)) return false;

    ...
  }
}
```

```javascript
// (BEFORE) Non-Universal Routes

server.get(CLIENT_ROUTES, (req, res) => {
    res.sendFile(join(distFolder, 'index.html'));
});

// (AFTER) Universal Routes

server.get('*', (req, res) => {
  res.render(indexHtml, { req, providers: [...] });
});
```
