Reactive Forms

```
export class UserComponent {

    public user = new FormGroup({

        name: new FormControl('', Validators.required),

        surname: new FormControl('', Validators.required)

    })

}
```

Reactive Forms

Creazione del Form nella
classe del componente

```html
<form [formGroup]="user" (ngSubmit)="onSubmit()">
  <input type="text" formControlName="name">
  <input type="text" formControlName="surname">
</form>
```
